OnboardIQ

DayOne Proof

A completed task is a claim.
Evidence is the proof.

One plan, a named owner for every step, and outcomes checked independently. AI proposes fixes; people approve.

BUILT FOR 7 ROLES IN ONE COMPANY

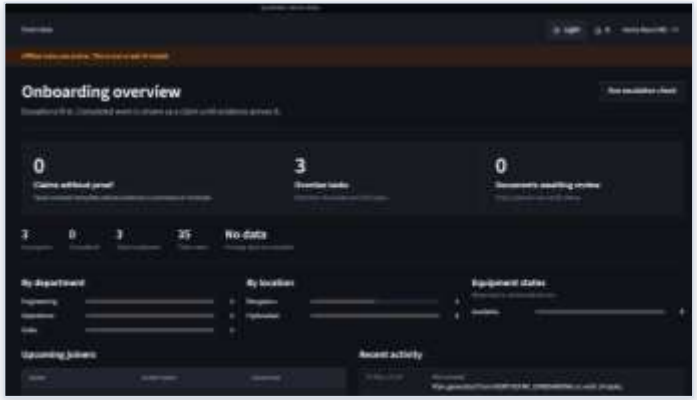

HR | IT | Payroll | Benefits | Training | Manager | Employee

Missing proof = UNKNOWN, never success

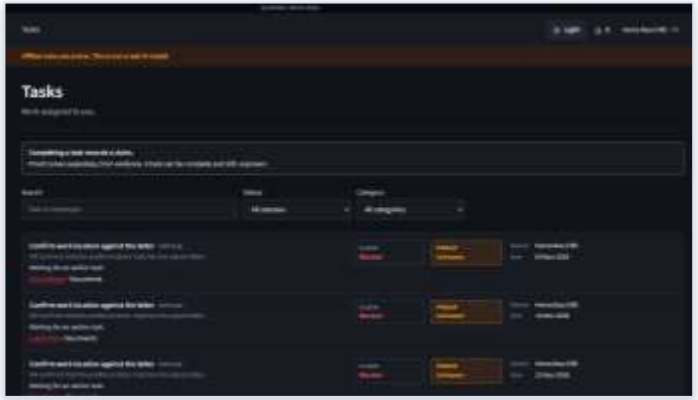

Follow Priya: one hire, every handoff checked

1. **HR creates the hire**
   Engineer profile, Hyderabad
2. **Rules build the plan**
   6 categories · owners · deadlines · dependencies
3. **Priya uploads her offer**
   AI extraction flags Bengaluru ≠ Hyderabad
4. **Agent asks HR**
   Scoped reads; the wait is saved, nothing guessed
5. **HR, then IT, approve**
   Location change, then laptop reservation
6. **Backend reads back**
   “Reserved; collection pending”

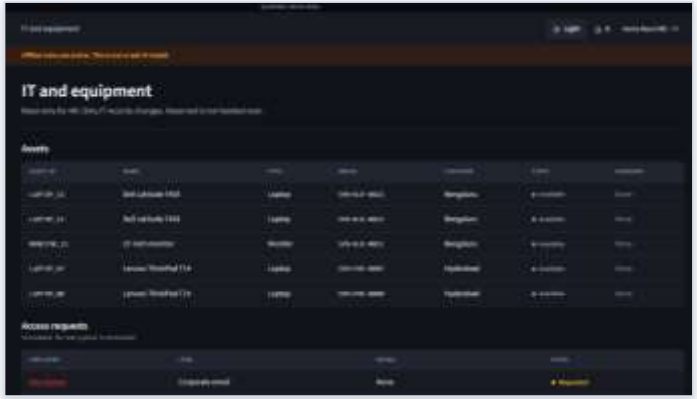

- Red = optional AI-assisted exception path; manual works with AI off

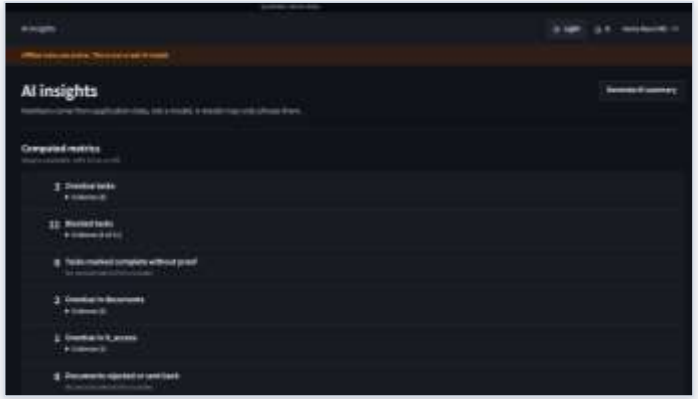

Overview: exceptions first

Tasks: claim beside its proof state

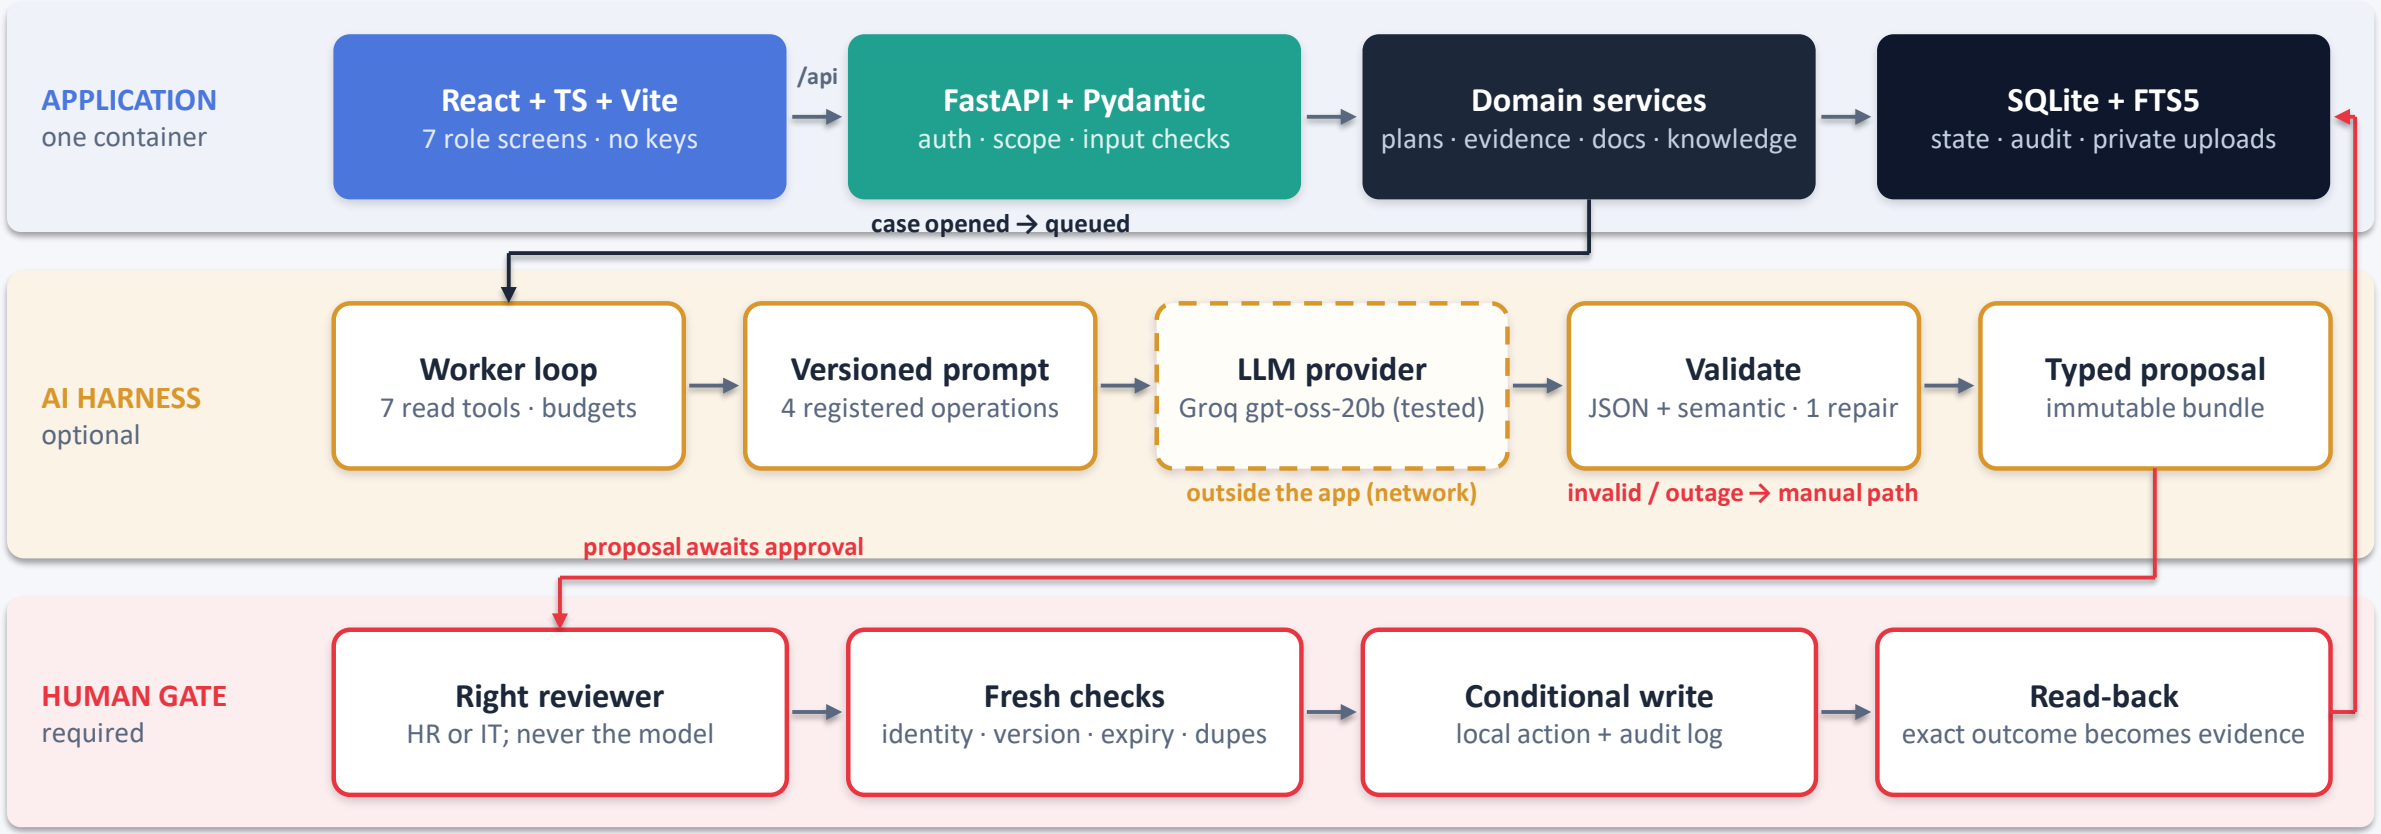

IT equipment: reserved ≠ handed over

AI insights: overdue and blocked tasks

AI proposes. Trusted code controls.

DEPLOY
Docker on Render free tier · AI off by default · GitHub Actions CI

EVALS
evals/run.py · 82 scenarios · isolated DB · same harness

RULE
No model-to-database path: every write passes a person and code checks

Show the proof, and its limits

GUARDRAILS · BUILT

Access control
scrypt hashing · lockout · scope checks

Input validation
Pydantic · 5 MB cap · type allowlist

AI output checks
schema + semantic · quotes verified

Human authority
only the right HR/IT reviewer approves

Stale & duplicate
version · expiry · duplicate checks

Failure path
outage or quota → manual workflow

Method: pytest + Vitest on isolated synthetic DBs with scripted model replies, incl. OWASP, fuzzing, race and chaos suites.

AUTOMATED TESTS · fresh run, 7 Nov 2026

205 / 205
backend tests pass

58 / 58
frontend tests pass

LIVE MODEL EVAL · Groq gpt-oss-20b · 6 Nov · one run

0	permission leaks
0 / 10	injection attempts leaked
8 / 8	advice requests refused
5 / 11	new questions: right source

Limits: free-tier rate limits hit 7 of 39 calls; one journey ≠ success rate.
Independent held-out eval: **PLANNED**

Less repeated entry. Same accountability.

NOW

PLANNED · A1

Prompt-to-hire draft

HR describes a hire once; AI fills an editable draft

Expected: fewer repeated field entries

PLANNED · A7

Better grounded answers

close the 5 / 11 new-question gap

Expected: fewer HR escalations

NEXT

PLANNED · A2

HR rule editor

preview and publish versioned rules

Expected: onboarding configured without code

PLANNED · A3

Extract on upload

flag conflicts automatically

Expected: mismatches caught before day one

LATER

PLANNED · INFRA

Production foundations

SSO · PostgreSQL · durable hosting · email/Slack

Expected: a path to a real pilot

PLANNED · A5

Department copilots

narrow, approval-gated help per role

Expected: less manual chasing per team

We will measure, not assume: timed same-task study · unseen-question eval · setup edits vs today's flow

Clear work. Accountable handoffs. Checked outcomes.
