SUMMARY

Innovative and disciplined B.E. Computer Science & Engineering student with a strong foundation in computer systems, algorithms, and software engineering principles. Skilled in designing efficient, reliable, and scalable computing solutions through a deep understanding of data structures, operating systems, and network fundamentals.

EDUCATION

BE | Dayananda Sagar Academy of Technology And Management | 2027	CGPA: 9.47
PUC | Vision Girls PU College | 2023	Percentage: 93.166%
X | Gnana Jyothi School | 2021	Percentage: 89%

PROJECTS

- **Electricity Billing System (Java, SQL, HTML, CSS, JavaScript)**
  Developed a web-based billing application to calculate electricity charges based on user input (watts).Integrated online payment functionality and a responsive user interface for seamless bill generation and payment.
- **Student Management System (Python, Django)**
  Built a role-based management system for student and faculty records. Implemented restricted access where teachers can view student data, and HODs can manage both student and faculty databases.
- **Hand Gesture Recognition (CNN, Image Processing)**
  Designed a deep learning model using CNN to identify hand gestures for real-time recognition. Processed and augmented image datasets to improve accuracy and applied the model to human–computer interaction.
- **House Price Prediction System (Pandas, Scikit-learn, HTML, CSS, JavaScript)**
  Developed a web application to predict house prices using regression-based machine learning models. Integrated the trained model with a Django-based web interface for interactive predictions and data visualization.

TECHNICAL SKILLS

- **Languages:** C, Python, SQL
- **Core Concepts:** DSA, OOP, 0S,DBMS,Computer networks, Problem Solving
- **Web & Frameworks:** HTML, CSS, JavaScript, Flask(basic), Django(basic)
- **Tools:** Git, GitHub, VS Code, XAMPP, Google Colab, Postman(basic)

SOFT SKILLS

- Adaptability
- Quick Learner
- Time Management
- Collaboration
- Analytical Thinking

CERTIFICATIONS

- **The Complete Git Guide: Understand and master Git and GitHub|** (March 2025)
- **Python Course for Beginners: Mastering the essentials |** (December 2024)
- **Programming in C |** (January 2024)
- **Introduction to Cryptography for Beginners |** (October 2025)
- **DBMS Course- Master the Fundamentals and Advanced Concepts |** (April 2025)

INTERESTS

- Travelling
- Programming
- Playing Chess

LANGUAGES

- **English**
  Professional Working Proficiency
- **Kannada**
  Native or Bilingual Proficiency
