KOUSHIK A

Bengaluru, India | koushik282005@gmail.com | +91 9663604215 | LinkedIn | GitHub

CAREER OBJECTIVE

Computer Science undergraduate graduating in 2027 with a strong foundation in Java, Spring Boot, React.js, REST APIs, and database integration. Experienced in building full-stack applications with role-based authentication and AI-assisted features. Interested in solving real-world customer problems through API integrations, AI-powered solutions, and collaborative engineering. Eager to contribute to Plivo as a Forward Deployed Engineer Intern.

EDUCATION

Dayananda Sagar Academy of Technology and Management — B.E. in Computer Science *2027*
CGPA: **9.02 / 10**

Vijaya Composite PU College — Higher Secondary (Science) *2023*
Percentage: **94.5%**

Vijaya High School — SSLC *2021*
Percentage: **87.84%**

TECHNICAL SKILLS

Languages: Java
Backend: Spring Boot, Spring Security, JDBC, Servlets, Hibernate, REST APIs
Frontend: HTML, CSS, React.js
Databases: MySQL
Tools: Git, GitHub, VS Code
AI/GenAI: Generative AI fundamentals, LLM & Prompt Engineering.

EXPERIENCE

Java Full Stack Training *Apr 2026 – Jul 2026*
QSpiders (Test Yantra Software Solutions), Bengaluru

- Underwent structured training in backend and frontend development as part of the internship, applying concepts through practical, end-to-end assignments.
- Built a full-stack capstone project as a culminating deliverable, applying backend and frontend concepts learned during the program end-to-end.
- Recognized for consistency and strong technical fundamentals throughout the internship.

PROJECTS

ChainProof AI — Digital Forensics Evidence Management Platform (College Major Project)

- Built a forensic evidence platform using Spring Boot and MySQL that secures files with AES-256 encryption and SHA-256 hashing and anchors custody events on an Ethereum-compatible blockchain (Solidity smart contract).
- Developed ML modules in scikit-learn: Isolation Forest for real-time anomaly detection on custody events and Random Forest to predict violation probability, with explainable risk factors.
- Added an explainable evidence confidence score, a retrieval-based forensic copilot answering from live database records, and automated PDF report generation.

NexusIQ — Enterprise Workflow Execution Platform

- Built a full-stack workflow validation system enabling organizations to define SOPs (e.g., expense approvals) and track execution in real time.
- Implemented role-based access control (Admin/Manager/Employee) using Spring Security and JWT, with a rule engine that auto flags skipped or overdue approval steps.
- Designed a compliance-scoring dashboard aggregating workflow adherence using Spring Boot, React.js, MySQL, and REST APIs.

CERTIFICATIONS

- Agentic AI Certified Foundations Associate — Oracle University (Jul 2026)
- Java Full Stack Training — QSpiders
- Fundamentals of Object-Oriented Programming — NPTEL
- Getting Started with Generative AI — IBM
