CAREER OBJECTIVE

Motivated Computer Science undergraduate at Dayananda Sagar College of Engineering with a strong academic record (CGPA: 9.0), seeking internship and project opportunities to apply programming expertise, data structures knowledge, and problem-solving skills. Passionate about software development, machine learning, and mobile application development, and committed to contributing meaningfully to real-world engineering challenges.

EDUCATION

BE – Computer Science and Engineering 2023 – 2027
Dayananda Sagar College of Engineering, Bengaluru | Current CGPA: **9.0/ 10.0**

Class 12 (PUC) – Science Stream 2023
MES PU College, Sirsi | Percentage: 90.5% | PCM: 98.3%

Class 10 – Secondary School Certificate 2021
Lions English Medium High School, Sirsi | Percentage: 99.04%

TECHNICAL SKILLS

Programming Languages: C, C++ (Core), Java (Basic), HTML, SQL

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

Tools & Technologies: Git, GitHub, VS Code, Tableau, Android Studio

Frameworks & Libraries: Flask, Flutter

Databases: MySQL, Firebase (Realtime Database)

Interests: Mobile App Development, Web Development, Machine Learning, Cloud Computing

ACADEMIC PROJECTS

Volunteer Management App *Android Studio • Java • Firebase*

- Developed a full-featured Android mobile application enabling users to register as volunteers or organizers.
- Organizers can create events with date, venue, description, and required volunteer count; volunteers browse nearby events.
- Implemented Firebase Realtime Database for live data synchronization and two-way participation request management.

SafeTour – AI-Powered Travel Safety Platform *HTML • CSS • JavaScript • Python • Flask • Scikit-learn • MySQL*

- Designed and built a web-based travel safety platform to help users make informed, data-driven travel decisions.
- Applied ML classification (Scikit-learn) to predict location-based risk levels and recommend safer alternative routes.
- Features include real-time safety alerts, emergency SOS assistance, safety score visualization, and incident reporting.
- Backend built with Python and Flask; data stored and managed in a structured MySQL relational database.

CERTIFICATIONS

- Google Cloud Career Launchpad – Computing Foundations Track (Issued by Google Cloud)
- Networking Basics – Cisco Networking Academy Program
- Computer Networks and Internet Protocol-NPTEL
- Hackathon: Secured 4th place at a DSATM college hackathon.
