Education

Dayananda Sagar College of Engineering 2023 – Expected 2027
B.E. in Computer Science and Engineering **CGPA: 9.18/10**
Relevant Coursework: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks

Experience

Software Engineering Intern – Joveo Jul 2026 – Sep 2026

- Reduced feed-ingestion runtime from **6+ hours to 20 minutes** on comparable workloads using parallel staging loads, PostgreSQL `COPY`, and a consolidated merge into Supabase.
- Implemented caching and pre-aggregated search-suggestion lookups across **1.6 million job listings**; corrected duplicate results, location matching, and pagination.
- Developed RunPod backfill jobs for BGE-M3 embedding/classification pipelines and added worker-failure monitoring.

Freelance Software Developer – Khaleezi *(Part-time)* Jan 2025 – Sep 2026

- Delivered a live React/TypeScript storefront and admin dashboard for a Bengaluru apparel client, supporting **50+ orders since launch**; preserved custom-design previews and customization pricing through fulfillment.
- Enforced server-side checkout pricing and verified Razorpay payments against the authenticated customer's order; used idempotency keys and MongoDB stock transactions to guard against repeat submissions and overselling.
- Integrated shipment creation, label printing, and order tracking into one admin workflow through Shiprocket; migrated product-image storage to Cloudflare R2.

Software Developer Intern – Syntellite Sep 2025 – Oct 2025

- Built Next.js/TypeScript client websites and Supabase-backed admin dashboards; refined request routing, data fetching, and SQL queries to reduce redundant API calls.

Projects

FirmWeave – Business Entity Resolution *Python, Polars, LightGBM, AWS*

- Built an entity-resolution pipeline for US/India/France business records; processed **1.73M references against 9.97M targets** on AWS SageMaker using country-aware retrieval and LightGBM matching.
- Implemented compatibility-checked checkpoints and atomic writes to resume interrupted batch inference safely.

SnapSure – Deepfake Detection App [GitHub] *Next.js, Flask, Docker, Kubernetes*

- Averaged fake-image scores from **2 pretrained classifiers** behind a Flask API and Next.js upload UI; returned labels, confidence, and separate MTCNN face counts.
- Containerized **2 services** (frontend/API) with Docker; reused model weights and configured Kubernetes startup, readiness, and liveness probes for local deployment.

Support Triage Agent [GitHub] *Python, ChromaDB, BM25*

- Implemented hybrid vector/BM25 retrieval over **773 support documents** from Claude, HackerRank, and Visa documentation, using domain filtering and reciprocal rank fusion.
- Routed tickets to reply or escalation with rule checks and LLM review; escalated on missing context or safety-call failures and retried unparseable JSON responses.

Rehear – Desktop Transcription Assistant *(Personal Project)* *Electron, React*

- Built an Electron/React transcription workspace with local/cloud model routing and persistent session history.
- Covered routing, PDF/DOCX parsing, history, and audio lifecycle with **114 unit/integration tests**; added validated IPC and cancellable requests.

Technical Skills

Languages: C, C++, Python, Go (Golang), TypeScript, JavaScript, SQL
Web & APIs: React, Next.js, Express, FastAPI, Electron, REST APIs, GraphQL
Data, AI & Tools: PostgreSQL, MongoDB, Supabase, ChromaDB, LightGBM, scikit-learn, PyTorch, RAG, n8n, Docker, Kubernetes (Minikube), GitHub Actions, Git, AWS (SageMaker, S3)

Achievements & Credentials

- **HackerRank Orchestrate (May 2026):** Ranked **720th**; Certificate of Excellence.
- **NPTEL / IIT Kanpur:** Cloud Computing and Distributed Systems — **Elite + Silver, 85%** (Mar 2026).
- **IIT Madras Shaastra 2025:** Finalist in the Shaastra Programming Contest and CP Potpourri.
- **SMARTDARTS – IoT Safety Ring:** Patent application filed (No. 202441092557).
- **Google Cloud Career Launchpad:** Computing Foundations track — courses and labs completed (Apr 2026).
