Summary

Computer Science undergraduate with hands-on experience developing production backend systems, REST APIs, and scalable software solutions through industry internships. Strong foundation in C++, Python, Data Structures & Algorithms, and backend engineering.

Education

Dayananda Sagar College Of Engineering **Oct 2023 – Oct 2027**
B.E in Computer Science and Engineering *CGPA: 9.59/10*

Rani Laxmi Bai Memorial School **2022**
Class XII – Central Board of Secondary Education (CBSE) *97%*

Technical Skills

Languages: C++, Python, JavaScript
Frameworks & APIs: FastAPI, Flask, Node.js, Express.js, React.js, Next.js, REST APIs
Databases: MySQL, MongoDB, ChromaDB
Tools & Platforms: Git, GitHub, Docker
AI & ML: RAG, Gemini API, LLM Pipelines, XGBoost
CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Experience

Serri Tech Labs Pvt. Ltd. **July 2026 – oct 2026**
Full Stack Intern *Remote*

- Developed Pabbly Connect and CleverTap integrations by implementing REST APIs, webhook workflows, and backend services.
- Implemented scalable backend APIs and services using MongoDB and Docker across multiple production repositories.
- Resolved production issues through debugging, end-to-end testing, code reviews, and CI/CD workflows.

Havells India Ltd. **Feb 2026 – May 2026**
Project Trainee *Remote*

- Built an intent classification system combining rule-based routing and LLM predictions across 6+ query categories with out-of-scope detection.
- Developed an automated evaluation framework to benchmark 12,000+ queries using latency, accuracy, and error metrics.
- Benchmarked multilingual TTS APIs across 2,000+ requests by evaluating latency, TTFA, and throughput metrics.

Projects

AI Payment Threat Guardian | *FastAPI, React, MongoDB, ChromaDB* **GitHub**

- Developed a multi-agent payment security pipeline using FastAPI and Gemini 2.5 Flash to detect prompt injection attacks.
- Implemented RAG using ChromaDB to retrieve PCI-DSS requirements for real-time compliance validation.
- Developed a React dashboard backed by FastAPI and MongoDB for threat monitoring and audit logging.

PlanGrid – Supply Chain Forecasting System | *React, Flask, MongoDB, XGBoost* **GitHub**

- Developed a Flask backend integrating XGBoost models to forecast material demand using historical supply chain datasets.
- Developed REST APIs to serve real-time demand forecasting with confidence scoring and procurement analytics.
- Built geospatial dashboards and automated procurement workflows for data-driven infrastructure planning.

Achievements & Certifications

- **Solved 300+ Data Structures & Algorithms Problems** – Across LeetCode, GeeksforGeeks, and HackerRank.
- **NPTEL Computer Networks and Internet Protocol** – Completed NPTEL certification.
- **Google Cloud Career Launchpad** – Completed Google's cloud foundations program.
- **Smart India Hackathon 2025 Internal Round** – Qualified for the institute's internal round.
- **GirlScript Summer of Code 2025** – Selected as an open-source contributor.
